Data Science & Visualization Enthusiast | AI/ML Student

OBJECTIVE

Motivated AI/ML engineering student with a strong foundation in Python, data analysis, and machine learning, seeking an opportunity in Data Science and Data Visualization. Passionate about transforming raw data into meaningful insights through exploratory analysis, statistical modeling, and compelling visual storytelling.

EDUCATION

Parul University

2023 – 2027

Bachelor of Technology, Computer Science (Specialisation in Artificial Intelligence)

- Specialization in Artificial Intelligence with coursework in Machine Learning, Neural Networks, Data Structures, and Statistics.
- Applying Python and data libraries to academic projects focused on data analysis and visualization.

Gujarat Secondary & Higher Secondary Education Board

Completed

Higher Secondary Education (12th – Science)

- Strong fundamentals in Mathematics and Statistics — core disciplines for data science and analytical problem solving.

PROJECTS

Exploratory Data Analysis (EDA) Projects | Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed end-to-end EDA on sample datasets — handling missing values, outliers, feature distributions, and correlation analysis using Pandas and NumPy.
- Produced static and styled visualizations to communicate data insights clearly using Matplotlib and Seaborn.

ML Prediction Models | Scikit-learn, Python

- Built supervised learning models (linear regression, decision trees, k-NN) for outcome prediction on structured datasets.
- Practiced model evaluation with train-test splits and performance metrics to ensure reliable generalization.

TECHNICAL SKILLS

Programming: Python, C, C++, SQL (Basic)

AI / ML: Machine Learning, Artificial Neural Networks (ANN), Deep Learning Basics, Model Training & Evaluation

Libraries: NumPy, Pandas, Scikit-learn, TensorFlow (Basic), PyTorch (Basic), Matplotlib, Seaborn

Tools: Jupyter Notebook, Google Colab, VS Code, Git, GitHub

Soft Skills: Problem Solving, Logical Thinking, Quick Learner, Team Collaboration

Languages: Hindi (Native), English (Fluent), Gujarati (Fluent)

EXPERIENCE

Academic & Self-Learning — Data Science & Visualization Focus

Present

Fresher / Student

- Practiced data wrangling, cleaning, and exploratory data analysis (EDA) using Pandas and NumPy on structured datasets.
- Created data visualizations including bar charts, heatmaps, scatter plots, and trend lines using Matplotlib and Seaborn in Jupyter Notebook and Google Colab.
- Applied Scikit-learn for regression, classification, and clustering; evaluated models using accuracy, precision, recall, and confusion matrices.
- Maintained projects on GitHub with clean, reproducible data science workflows.

ACHIEVEMENTS & LEARNING

- Actively deepening knowledge of the full Data Science workflow — from data collection and preprocessing to visualization and storytelling.

- Exploring advanced topics including feature engineering, dimensionality reduction (PCA), and dashboard-style visualizations.
- Continuously practicing Data Structures and Algorithms to strengthen problem-solving skills for data-intensive applications.
